

Industry

Life Sciences

Mirick represents well-established companies as well as start-up enterprises and institutions in the life sciences sector to help meet their legal and business objectives. We advise on business transactions, mergers and acquisitions, securing start-up venture capital and private equity financing, labor and employment issues, and real estate and land use matters. Our litigation attorneys also have a successful track record in defending life science clients.

Experience

- Successfully negotiated and documented a series of multi-million dollar acquisitions that expanded the scope and types of services offered by a large medical services provider
- Successfully negotiated and documented equity and debt-based capital infusions for early-stage life science organizations
- Developed and implemented licensing and product development programs for a start-up biotechnology company
- Developed and executed a complex litigation-based strategy to secure sole ownership of an IP portfolio relating to client's core business technology
- Strategically initiated re-examination proceedings of patents asserted against a client in infringement proceedings resulting in successful resolution of the litigation
- Secured a permanent injunction and contempt of court decision, a verdict of willful patent infringement, and a multi-million dollar
