Industry

Technology

In today's fast-paced world, technology companies need a law firm that can keep up. From software to telecommunications and everything in between, Mirick moves at the speed of your business whether a privately held start up or a mature, publicly traded company. We use an interdisciplinary approach to representing our technology clients to provide comprehensive and well-rounded solutions that meet your unique business objectives.

Technology companies hire Mirick for the following services:

- Corporate Finance Transactions
- Mergers and Acquisitions
- Securities and Venture Capital Transactions
- Negotiate and Draft Licensing, SaaS, Manufacturing, Supply, Development, and Joint-Venture Agreements
- Enforcing and Defending Intellectual Property Rights
- Commercial Disputes

Experience

- Represented a planar fuel cell technology company in its acquisition by a public company
- Successfully negotiated subcontracts with a major defense contractor for a developer and manufacturer of miniature sensor in missile defense systems
- Represented a technology company in connection with a $6 million
