Service

Government Investigations Response and Compliance

The Government Investigations Response and Compliance Team represents clients in a range of matters including government investigations, regulatory and administrative proceedings, and criminal prosecutions. Our attorneys represent individuals and organizations that are the subject of investigations by the FBI, SEC, U.S. Department of Justice, U.S. Attorney's Office, state Office of the Attorney General and other federal, state and local enforcement agencies. We also advise organizations that discover employee malfeasance or theft, or whose employees are the subject of a criminal investigation.

Our attorneys have represented clients in actions involving allegations of health care fraud, unfair lending practices, embezzlement, fraudulent billing practices and bank fraud. The Government Investigations Response and Compliance Group has conducted internal corporate investigations at the direction of audit committees and in response to outside criminal investigations. Our attorneys also handle academic disciplinary matters where parallel criminal proceedings are involved.
