Intellectual Property Litigation

Litigation is one of the options available to businesses as part of their offensive and defensive strategies to protect their valuable intellectual property rights.

At Mirick, our skilled litigators vigorously enforce and defend our clients' intellectual property rights in state and federal courts and before arbitration panels and administrative agencies.

Our intellectual property litigation experience includes cases involving:

- Patent infringement
- Trademark/trade dress and copyright infringement
- Anti-trust and unfair competition
- Licensing disputes

Entrepreneurs, inventors, small businesses, established and emerging companies, and private and public companies alike turn to Mirick when they suspect that their intellectual property rights have been violated. We have a successful track record in obtaining favorable outcomes for our clients.
